SportsWareOnline Coaches Packet

The following are print screens of how to access the coach’s portal and different aspects of that portal.

SportsWare Online will allow coaches to see the game/practice status of their student athletes, the status of their student athlete’s medical paperwork and communicate with the athletic training staff. SportsWare Online is also available via mobile device.

Above is the log in screen for SportsWare Online. This link can be found on the sports medicine website.
After logging in the coach will be brought to the main screen or “Dashboard”. Here the coach can access different information about their student athletes.
On the dashboard if a coach selected the team roster report (1) they would see every member of their team listed, their address and their phone number.

If a coach were to select the Team Travel Report(2) they would get the emergency form for each of their athletes. These forms will also be in the black emergency booklets given Head coaches at the start of each season.
If a coach chooses the paperwork option (3) off of the dashboard they will be brought to the screen above. This will show all the team members for that sport and the status of their medical paperwork. Once an athlete has submitted their paperwork and it has been accepted by the athletic training staff a date will appear in each box.

If the coach chooses “Report” (4) under practice or game this screen will come up. Here it will list each athlete who is currently seeking treatment for an ongoing injury or is currently being held due to an injury. It will list their game/practice status and any notes. On the dashboard if an athlete is listed with an injury the coach can select “view” to the left of the athletes name and see a more in depth report.
If a coach selects “Athlete” it will bring them to the page above where they can see all the athletes that are currently on their roster. If they choose view next to a particular athlete they will see a more in depth chart of the athlete.

Any time view is selected next to an athlete this is the page the coach will see. It is an in depth chart of the athlete including emergency contact information, status and injuries.
